

1. 去除各种空格

```
public String trim(String str) {  
    // "\u0020" 半角空格, office空格, 全角空格  
    return str.trim().replace("\u00a0", "").replace("\u3000", "");  
}
```

1.1. simple trim

```
str.trim()
```

1.2. test font

```
true = 1
```
